

## Getting Started with ArcIMS Air Quality Monitoring & Point Source Emissions

*Last Updated January 7, 2005*

### Introduction

This interactive web mapping application provides access to DEQ's Air Quality Monitoring Site locations and Point Source Emission Facility locations. The Air Quality site is a collection of WEB enabled GIS tools and GIS layers that allows users to view and select monitoring locations throughout the State of Idaho and view real time air quality data.

This Site is currently supported with **Internet Explorer 5.5** and higher (Netscape and other browsers are not supported at this time. It is best viewed on screens with resolutions of **1024 x 768** or higher.

**If the Application Becomes Unresponsive, Click Ctrl & F5 to Reset**

### Navigating ArcIMS

### Top Frame

### Monitor Selector

**Air Quality Monitoring Locations Idaho DEQ**

HELP | [Icons] | Zoom to Scale | [Icons] | TABLE

Select Air Monitoring Links . . . . .  
Select Air Monitoring Links . . . . .  
E-BAM  
Urban Air Toxics  
CO Monitors  
SO2 Monitors  
O3 Monitors  
PM2.5 TEOM  
PM10 TEOM  
PM10 HI Volume Sampler  
PM2.5 Manual FRM  
PM2.5 Sequential FRM

To View Air Quality Monitoring locations by type, use the dropdown box located top right. Clicking on a monitor type will create a list of currently deployed monitors throughout the State.

Click on a **SITE** to Highlight, or **MONITOR TYPE** for more info, or **EMISSIONS** for Real Time Data.

SITE LOCATION	MONITOR TYPE	CITY	REGION	EMISSIONS
<a href="#">Monsanto</a>	<a href="#">SO2 Monitor</a>	Soda Springs	SC and Eastern Idaho	<a href="#">Real Time Air Quality Data</a>
<a href="#">Sewage Treatment Plant</a>	<a href="#">SO2 Monitor</a>	Pocatello	SC and Eastern Idaho	<a href="#">Real Time Air Quality Data</a>

Click on a Site Location to Zoom into the Location

Click on the Monitor Type for More Information

Click on the Real Time hyperlink for Real Time Data.

### The ArcIMS Tool Bar

Toggles Overview Map | Query Tool | Buffer Tool | Zoom to Full Extent | Zoom Previous | Zoom to predefined Scale | Zoom In | Pan | Attribute Information | Select Tool | Toggles Site Table

Shows Help | Print Map | Find Tool | Unselect Tool | Zoom to Active Theme | Zoom Out | Hyper-links | Measure Tool | Select with Line or polygon tool

## Tool Bar Operations are Performed on the Current Active Visible Layer

### The Legend and Layer List

**Toggles Visible and Active Layers** →

← **Toggles Legend and Layer List** →

**Additional Scale Dependant Layers may become available as you Zoom in closer.**

← **Refresh Map To make new additional layers visible**

### Using the Buffer Distance Site Selection Attributes Tools

In this example we will determine if there is a **Class One Airshed** located within **50 Miles** of a selected, **Point Source Emission Facility**

Step 1 — Click the **Layers** Button to Activate the Layers List

Step 2 — Click on the **Point Source Emissions** Layer, and Click the Refresh Map Button.

Step 3 — Using the Zoom In Tool, Zoom to the Center of State

Step 4— Select the **Bennett Lumber Products** Point Source Facility using the Select tool  
 Step 5—Click the **Buffer Tool** The buffer Menu will appear in the bottom Frame.

Buffer

Highlight features from Non-Attainment Areas within a distance of 50 MILES around the selected features of Point Source Emissions

Create Buffer

☒ Display Attributes

Step 6 — Choose Non-Attainment Areas form Features Pull down menu, Type in 50 for the Buffer Distance  
 Click on the Display Attributes Check Box. And Press **CREATE BUFFER**

50 Mile Buffer

If there are any Class One Airsheds located within 50 Miles of the Select Emission Facility, they will be selected (In Red) and the Attributes will be listed in the Bottom Frame

Class One Airsheds

Rec	AREA	PERIMETER	MYBCL1_	MYBCL1_ID	CLASS1_A	CLASS1
1	4440250000	489886	5	41	Selway Bitterroot	Selway Bitterroot
